good saturday (or what ever where ever you are).
I have a Collins 20V-2 parting out.... if you need anything
or want whats left, drop me a line...stating what parts ect.
your looking for. Trades are also welcome, but you still
pay shipping or pick up.

this is a 1KW AM broadcast transmitter.
thanks, for taking the time to read this post.

Hi, all!

One kind BAer sold me a Viking 2 and VFO a couple of weeks ago, and I finally got a chance to try things out.

It works!

The VFO does not, so I will open that up next. The Viking 2, on the other hand, puts out 100W on 40m and I had a crystal for 7025 ready, in case Ye Olde Glowbugge Rallye was to take place there again.

I just made two contacts into W3-land from Massachusetts on my lousy 40' wire, so I guess it works okay! Coincidence, both contacts were to guys working QRP rigs, 10 and 5W each.

So anyhow, if there be glowbugs ahoy tonight on 7025 I will give it a go. I tried with the Challenger on Wednesday night but no dice. There can be a lot of traffic.

See you on 7026 approximately!

this is going to have to be postponed for a while...
sorry.
